

使用說明

1. Project Github: <https://github.com/truong086/Notification App>

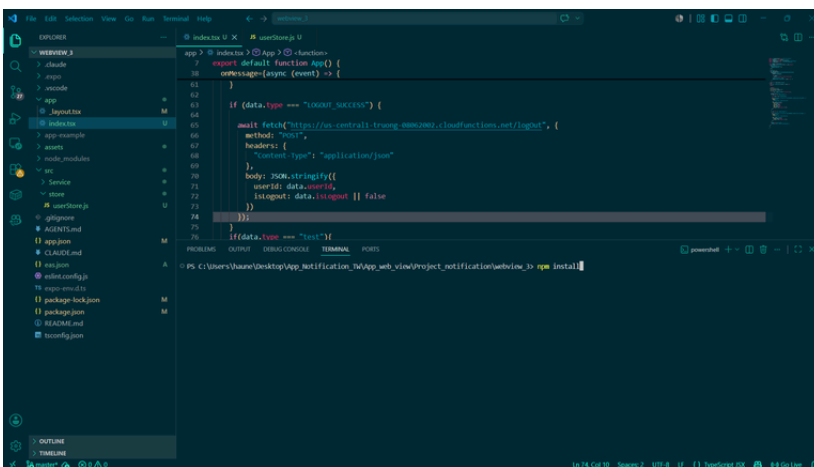

2. 啟動 React Native 專案:

a. 安裝 Visual Studio Code: <https://code.visualstudio.com>

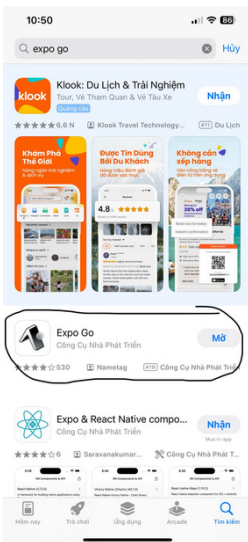

b. 在 Visual Studio Code 中開啟 React Native 專案

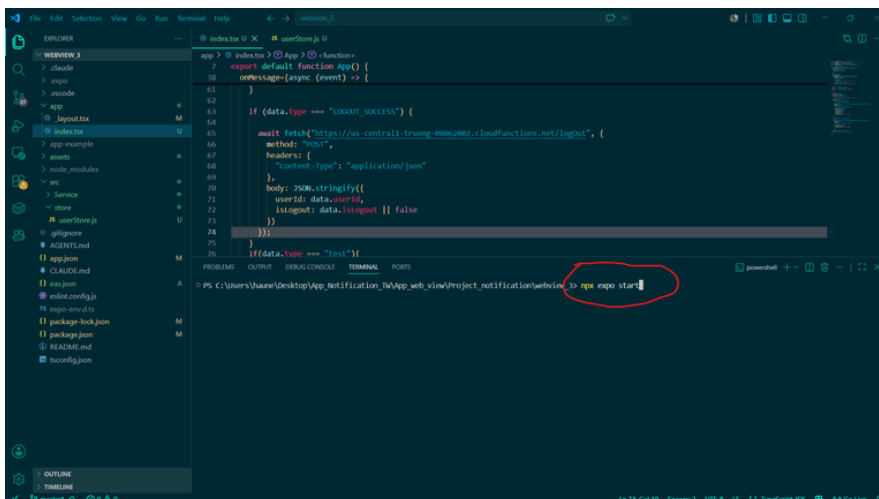

c. 輸入「npm install」指令後，按下「Enter」鍵以安裝必要的套件

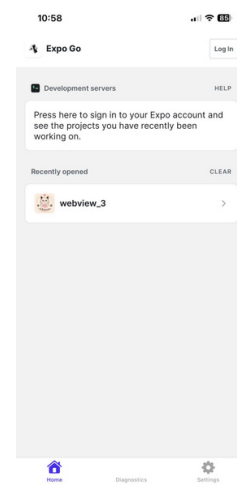

d. 前往 App Store 或 Google Play 商店安裝 Expo Go

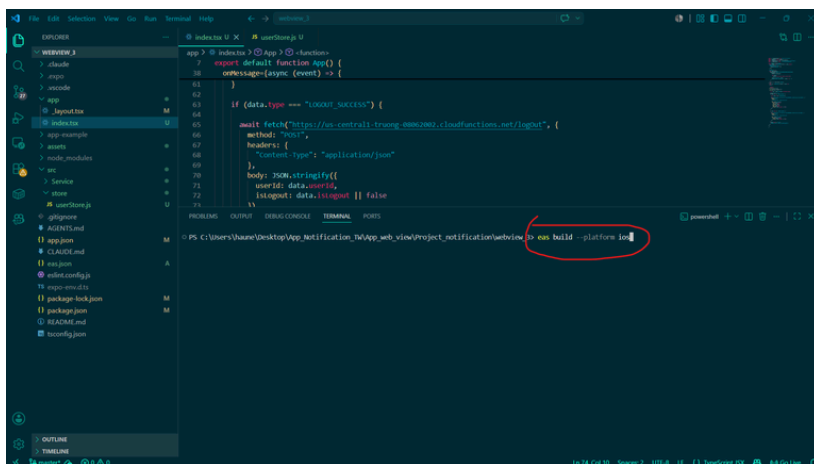

e. 在 Visual Studio Code 中開啟 React Native 專案，輸入「npx expo start」指令

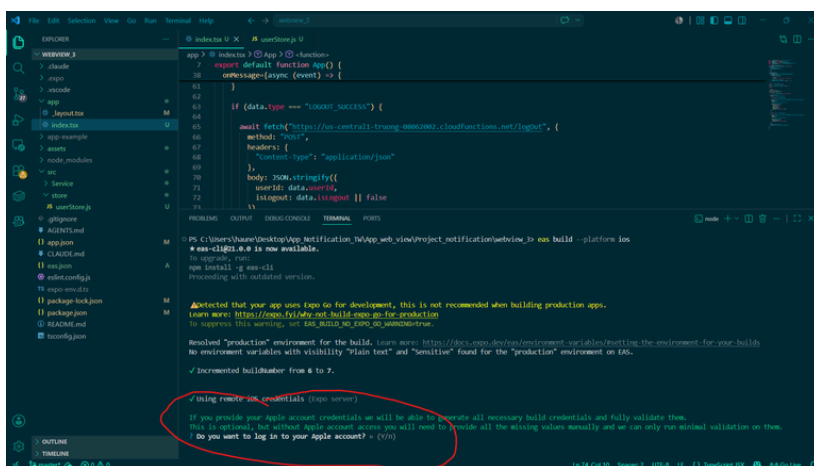

f. 接著使用 iPhone 的相機掃描 QR Code，應用程式會出現在 Expo Go 中，只需點擊該應用程式即可進入使用

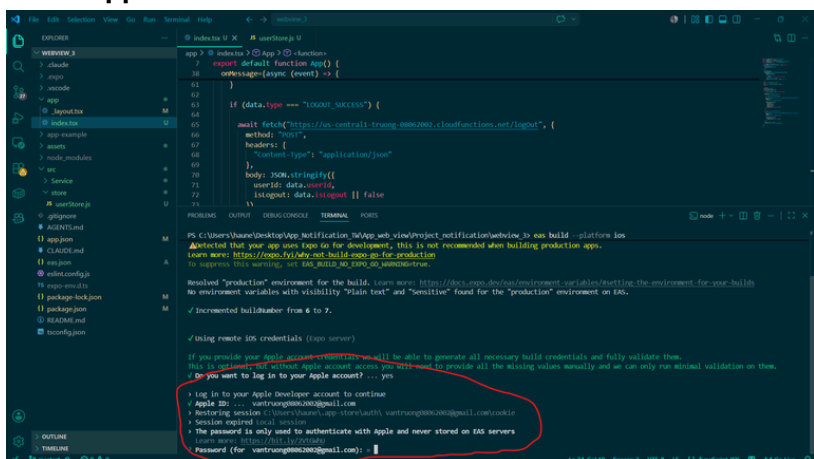

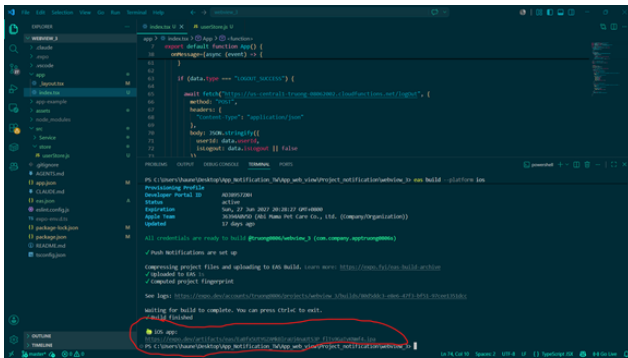

- 在此步驟中，請輸入「Y」

- 輸入 Apple 帳號與密碼

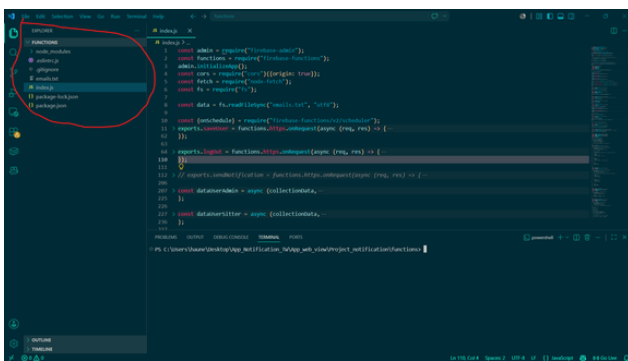

h. 點擊此連結以下載 .ipa 檔案

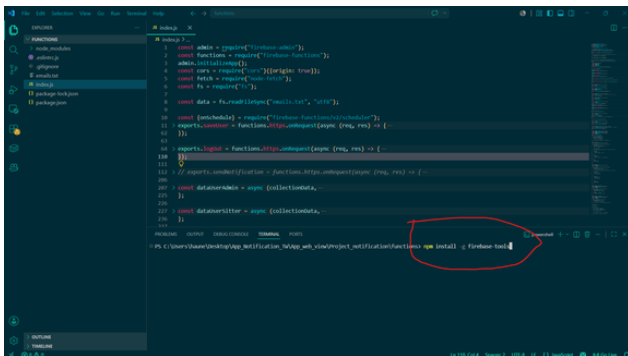

3. 啟動 Firebase Function (所有通知功能都會在此處執行)

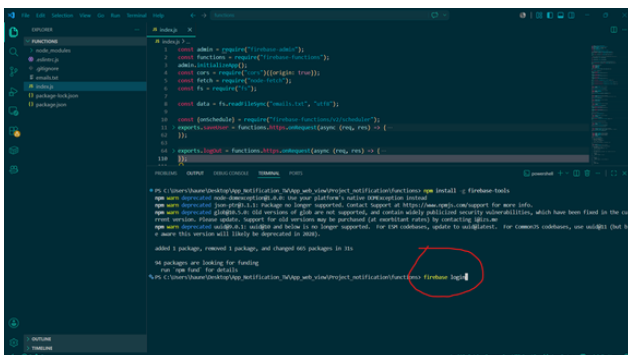

a. 在 Visual Studio Code 中開啟檔案

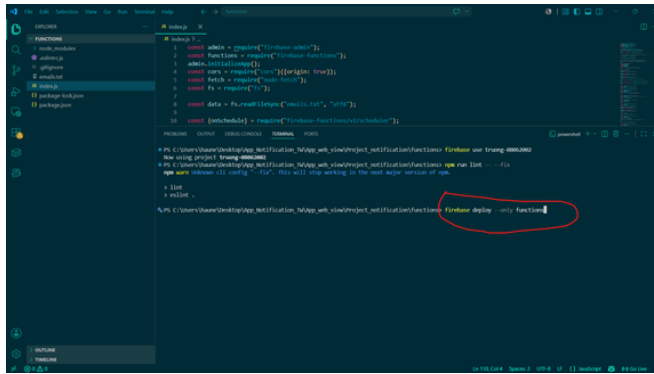

b. 執行「npm install -g firebase-tools」指令

c. 執行「firebase login」指令 (請使用您提供給我的 Email 帳號進行登入)

- 執行「**firebase deploy --only functions**」指令

```
1 const admin = require("firebase-admin");
2 const functions = require("firebase-functions");
3 admin.initializeApp();
4 const app = require("express")({url: true});
5 const fetch = require("node-fetch");
6 const fs = require("fs");
7
8 const data = fs.readFile("main.js", "utf8");
9
10 const [schedule] = require("firebase-functions-scheduler");
